

Do you wake up every morning and find yourself struggling to promote your home business? Are you getting little or no results from all your advertising efforts? If this sounds like you let me land you a hand, and help you learn some free and easy ways to promote your business.

Not many people know how well free advertising really works. They hear the word free and the first thing that pops into their mind is cheap, and it wont work. Well that isnt really all that true. Ive made a good amount of profits with my business just by using completely free traffic. Sure some of it will be useless junk, but that doesnt mean its all going to be junk.

So where are the hot free advertising places, and how can you use them to your advantage? My number favorite free advertising method is simply placing a link in my signature on message boards. I spend about twenty minutes a day just talking on message boards. While I get a lot of great information I also respond to a lot of people, and every time I leave a reply message you can see my signature link. Believe it or not this really does work. You will be amazed how many people see your link.

Another good little trick I like to do is have my signature in my e-mails. This is a great method to use when you e-mail people. Leave a simple signature so every time you e-mail someone they have a link back to your website. What I do is I will reply back to those nasty spam and bulk e-mails. Why? Because it sends it to someone, and you never know what will happen.

One other technique I use to generate free traffic is traffic swarm. For the little time and effort I put into traffic swarm it pays off in a huge way. Traffic Swarm is easy to setup, and anyone can create an account in just a few short minutes.

Everyday all you have to do is surf traffic swarm for about twenty minutes and build up about one hundred credits and your good to go for the day. Out of those credits you will usually get a good ten or so visits to your site per day. Depending on what your ad says you might even get more.

These are some fun, easy, and free ways to draw traffic to any website you might own. Always remember free traffic is better then no traffic.
